

mySewnet Embroidery Software
Levels: Gold/Platinum

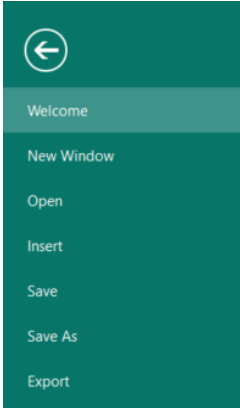

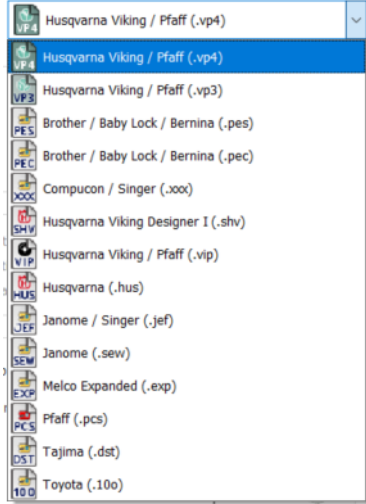

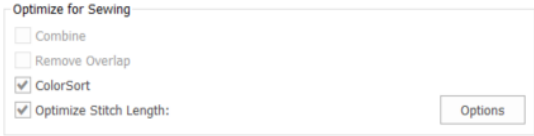

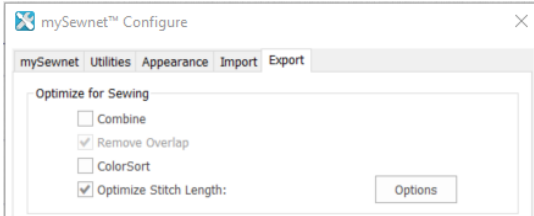

Project-in-the-Hoop Wizard

Create and customize a wide variety of in-the-hoop projects with this wizard.

- Choose from card holders, zipper pouches, phone cases, coasters and more
- Choose from various styles
- Use blank versions to create own lettering and designs.
- Benefit from PDF instructions, which guide the stitching and construction for each project

<p>1.</p>	<p>Open mySewnet Embroidery. Choose Blank Canvas. In the Hoop Selection pop-up choose 260mm x 200mm Hoop. Orientation Natural. Click OK</p> <p>Go to the create Tab and Projects-in-the-hoop</p>	
<p>2.</p>	<p>In the pop-up there are several different types of projects to choose from like book covers, keyrings, coasters etc. They are all available in different styles</p>	

<p>3..</p>	<p>In this example we are creating a Pencil Case in the style small triangle.</p>	
<p>4.</p>	<p>The dimensions are set by default on this project.</p> <p>Underneath you will find the pdf instruction for how to create this project.</p> <p>It shows the different design on the pencil case, but the process is the same.</p>	
<p>5.</p>	<p>It shows the different design on the pencil case, but the process is the same.</p> <p>You can choose to follow it on screen or download it for later.</p>	
<p>6.</p>	<p>To save the design click on File and Save As. This will save a .vp4 file that is fully editable again if you want to continue working with it.</p>	

<p>7.</p>	<p>If you want a different format you use the Export instead.</p>	
<p>8.</p>	<p>Here you will get a list of all available formats and you can choose the format you need for your embroidery machine.</p>	
<p>9.</p>	<p>On the Export pop-up you also get additional choices under Optimize for Sewing. These are settings you can change in Configure.</p>	
<p>10.</p>	<p>If you open Configure under the File menu and the Export Tab you can select your options. Removing the checkmarks for Combine and Color Sort helps if you want to decide when to do that manually before Export.</p> <p>This is very useful when working with Appliqué designs where you want to keep the number of color blocks for the technique steps.</p> <p>When you have made the changes click Apply and OK.</p>	

11. Under File and Print, you will get the option to print a template. This is perfect if you want to experiment with the placement or see how the design aligns.

Make sure the Design Scale is set to 100%

You can choose what information you want on your template by checking/unchecking the boxes under Print Information.

Print Setup

To create the pencil case, we used a faux leather and changed the colors to match.
